Humidifiers

Humid-Aire's Type L and H Centrifugal Humidifiers provide a simple solution to a variety of humidification needs as they are completely self-contained and require only a water supply and electrical connection for operation. Specifically designed for minimum maintenance, the fan and disc are the only moving parts and all parts coming in contact with water are made using stainless steel, copper, brass and aluminum materials to insure corrosion resistant operation. Type L and H Centrifugal Humidifiers are powered by fractional HP motors to insure low operating costs and profitable energy savings.

Humid-Aire manufactures sixteen different models and configurations in house and all models and configurations are available for immediate shipment. All Humid-Aire humidifiers are "wet tested" prior to shipment to insure a trouble free start-up. In addition, Humid-Aire stocks all replacement parts for Humid-Aire Humidifiers and also stocks replacement parts for other Humidifier models in the industry. Humid-Aire Type L and H Centrifugal Humidifiers are used world-wide in vegetable storage, fruit ripening, mushroom storage, greenhouses, woodworking plants, printing rooms, paper storage and tobacco processing and storage. The Humid-Aire Company has over 45 years experience in humidifier applications and complete climate control systems.

Humid-Aire Centrifugal Humidifier Specifications

	Type H	Type L
GPH Rating	24	36
Motor	1/4hp 3450 rpm 50 or 60hz Totally Enclosed Single Phase	3/4hp 3450rpm 50 or 60hz Totally Enclosed Three Phase
Power Requirements	115 or 230v 60hz 110 or 220v 50hz Single Phase	208,230,460v 60hz 190,208,220,380,415,440v 50hz Three Phase

Features: Narrow Fog Pattern, O.S.H.A. approved Fan Guards, Low Operating Costs, Uses No Nozzles, Available In Several Arrangements

Arrangements: Head Only Ventilated and Non-Ventilated
Floor Stand Ventilated and Non-Ventilated

Ceiling Mounted Ventilated and Non-Ventilated

Applications: Vegetable Storage, Mushroom Storage, Tobacco Storage, Paper Storage, Textile Mills, Wood Mills, Printing Rooms, Food Processing, Poultry

SPECIFICATIONS

Humid-Aire is a name synonymous with providing simple solutions to a variety of humidification needs. Humid-Aire models are self-contained and require only a water supply and electrical connection for operation. Specifically designed for minimum maintenance, the centrifugal design uses no expensive high pressure pumps or high maintenance nozzles. Other features include stainless steel, copper, brass and aluminum components to insure corrosion resistant operation. If you require quality equipment and system performance....think Humid-Aire.
