

Fans PRODUCTS

Gellert's Aerovent direct-drive panel fans are specifically designed for heavy-duty operation in the most demanding environments. Fan housings are constructed from heavy gauge steel and are hot dip galvanized for corrosion protection. Propellers are cast as a one piece unit from a specialty aluminum alloy that guarantees dependable, uniform performance and are factory balanced and tested, both statically and dynamically. Spiral type Outlet guards manufactured from electro plated zinc and welded wire inlet guards with removable sections for easy motor access are standard on all fans. All Gellert fans are tested and performance certified by AMCA (Air Movement and Control Association). Gellert offers a complete line of Aerovent fans to meet the needs of any Agricultural, Industrial or Commercial ventilation project.

Aerovent's trademark propeller designs are suitable for a wide variety of applications. Each propeller is manufactured to withstand the punishing loads and high rotational speeds characteristic of fan operation. Solid cast propellers are available from 9" to 72" and all propellers and hubs are cast from 319 aluminum as standard.

All Gellert Aerovent fans are licensed to bear the AMCA Seal and comply with the requirements of the AMCA Certified Ratings Program. This rigorous testing program ensures that every Gellert Aerovent fan delivers the airflow that you have paid for.

Gellert fans are supplied with Premium Efficient Totally Enclosed Fan Cooled Motors for superior reliability, energy savings and rugged performance. Designed for use with all brands of Variable Speed Frequency Drives for increased energy savings and improved product quality.

The Gellert Company is a name synonymous with quality equipment and innovative design for raw product storage systems. Since 1964, The Gellert Company has provided the most advanced Ventilation, Humidification, Refrigeration and Control equipment with an emphasis on efficiency, economy, dependability and fully Certified system performance. The Gellert Company is the industry leader in sales and service of agricultural climate control systems and continues to be first in balanced system design, first in equipment quality, and first in system performance. From potatoes, to onions, to grain, and everything in between... think Gellert.
