

# Refrigeration PRODUCTS

Gellert Air Cooled Refrigeration Units have been designed to meet the demanding requirements of raw product storage systems. Gellert markets the widest product range within the industry, offering thirteen standard models from a nominal 10-ton single compressor unit to 116-ton multiple compressor units. Every model consists of quality components, engineered and carefully matched for highest efficiency under all operating conditions and are available with a full complement of accessories ranging from Gellert Refrigeration Controls (GRC), to cooper fin condenser coils and special surface coatings. All models utilize the most advanced and efficient reciprocating, screw or scroll compressors in the industry.

Gellert Direct Expansion Coils are sized and matched to handle any system requirement. Standard construction includes copper tubing and aluminum fins. Coils are also available with full copper construction, special fin coatings and a variety of fin thicknesses.

The Gellert Refrigeration Controller (GRC) is an advanced microprocessor driven control system. The GRC provides optimum system efficiency, superior compressor and system protection as well as advanced monitoring and control capabilities.

The Gellert Company specializes in the sale of engineered cooling systems. These products include Condensing Units, Unit Coolers, Product Coolers, Chillers, Fluid Coolers and DX Coils all properly designed to meet the refrigeration needs of our customers.

The Gellert Company is a name synonymous with quality equipment and innovative design for raw product storage systems. Since 1964, The Gellert Company has provided the most advanced Ventilation, Humidification, Refrigeration and Control equipment with an emphasis on efficiency, economy, dependability and fully Certified system performance. The Gellert Company is the industry leader in sales and service of agricultural climate control systems and continues to be first in balanced system design, first in equipment quality, and first in system performance. From potatoes, to onions, to grain, and everything in between... think Gellert.
